

```
class A /copyable and assignable/ {  
    public:  
        explicit A() (constructor)  
        A& operator = (const A& original ) (makes class assignable)  
        A(const A& original) (copy constructor)  
        int16 getX()  
    private:  
        int16 x  
}
```
