

```
class B /neither copyable nor assignable/ {  
    public:  
        explicit B() (constructor)  
        int16 getX()  
    private:  
        int16 x  
        B& operator = (const B& o ) (makes class not assignable)  
        B(const B& o) (makes class not copyable)  
}
```
